

A range of ball valves for flow control on Geothermal manifolds.

Applications

- Geothermal energy systems
- Water pipe systems

Features

- Robust PVC construction
- Excellent flow control
- Leak-proof service
- EPDM seal
- Bonded sockets, internal and external threads and welded sockets as connecting parts connected to the ball valve body with a union nut
- PN10 DIN flange
- DN25(1") bis DN100 (4")

Specification	
Material	PVC, EPDM
Sizes	DN25(1") bis DN100 (4")
